System Requirements Specification

Hospital Compare Downloadable Database Data Dictionary

Centers for Medicare & Medicaid Services

https://data.medicare.gov/data/hospital-compare

Table of Contents

Introduction

Hospital Compare is a consumer-oriented website that provides information on the quality of care hospitals are providing to their patients. This information can help consumers make informed decisions about health care. Hospital Compare allows consumers to select multiple hospitals and directly compare performance measure information related to heart attack, emergency department care, preventive care, stroke care, and other conditions. The Centers for Medicare & Medicaid Services (CMS) created the Hospital Compare website to better inform health care consumers about a hospital's quality of care. Hospital Compare provides data on over 4,000 Medicare-certified hospitals, including acute care hospitals, critical access hospitals (CAHs), children's hospitals, Veterans Health Administration (VHA) Medical Centers, and hospital outpatient departments. Hospital Compare is part of an Administration-wide effort to increase the availability and accessibility of information on quality, utilization, and costs for effective, informed decision-making. More information about Hospital Compare can be found by visiting the CMS.gov website and performing a search for Hospital Compare. To access the Hospital Compare website, please visit www.medicare.gov/hospitalcompare.

Hospital Compare is typically updated, or refreshed, each quarter in January, April, July, and October, however, the refresh schedule is subject to change and not all measures will update during each quarterly release.

See the Measure Descriptions and Reporting Cycles section of this Data Dictionary for additional information. Hospital Compare data are reported in median time only; however, the median time is often referred to as the "average time" to allow for ease of understanding across a wider audience.

Links to download the data from the Downloadable Databases in zipped comma-separated value (CSV) flat file format can be found toward the top of the Official Hospital Compare Data website. A catalogue of datasets is also available toward the bottom of the website where files can be viewed and exported within a web browser. Datasets can be exported in a CSV format. A Get Started video tutorial is available on data.medicare.gov to assist with exporting the data. Embedded datasets for certain measures can also be found within the Hospital Compare website. Archived data in Microsoft Access and zipped comma-separated value (CSV) flat file formats from 2005 - 2018 are available in the Official Hospital Compare Data Archive.

All Hospital Compare websites are publically accessible. As works of the U.S. government, Hospital Compare data are in the public domain and permission is not required to reuse them. An attribution to the agency as the source is appreciated. Your materials, however, should not give the false impression of government endorsement of your commercial products or services.

Document Purpose

The purpose of this document is to provide a directory of material for use in the navigation of information contained within the Hospital Compare downloadable databases. The Appendix A – Hospital Compare Measures section in this data dictionary provides a full list of Hospital Compare measures contained in the downloadable databases. The Measure Dates section of this data dictionary provides additional information about measure dates and quarters. This information can also be found on the Hospital Compare website under Measures and current data collection periods and is organized as follows:

- General information (Overall Hospital Rating, demonstrating meaningful use, structural measures, and health information technology [HIT])
- Survey of patients' experiences – (Hospital Consumer Assessment of Healthcare Providers and Systems survey [HCAHPS])
- Timely and effective care (Cataract care, Colonscopy follow-up, Heart attack care, Emergency Department [ED] care, Preventive care, Cancer care, Blood clot prevention, Pregnancy & delivery care, and Outpatient imaging effeciency)
- Complications & deaths (Surgical complications, CMS Patient Safety Indicators [PSIs], Healthcare-associated infections [HAIs], and 30-day death [mortality] rates)
- Unplanned hospital visits (30-day rates of readmission and Excess Days in Acute Care [EDAC])
- Psychiatric Unit Services
- Payment & value of care (Medicare spending per beneficiary [MSPB], payment for heart attack, heart failure, hip/knee replacement, and pneumonia patients, and value of care for heart attack, heart failure, hip/knee replacement, and pneumonia patients)

In the Spotlight Section, there is a link to the Veterans Administration (VA) hospital embedded datasets displayed on Hospital Compare. Data is grouped in measure sets for display on the following pages:

- The Veterans Health Administration Hospital Performance Data
  - Timely and effective care
  - Behavioral health
  - Readmissions and deaths
  - Patient Safety Indicators
  - Experience of care

The Spotlight section of Hospital Compare provides links to data for the following quality reporting programs:
- Get information on inpatient psychiatric hospital and inpatient psychiatric unit services.
- Get hospital payment measures for 6 common types of clinical episodes in the downloadable databases.
- Veterans Administration hospitals data (VA)
- PPS-exempt cancer hospitals
- Ambulatory Surgical Centers
- American College of Surgeons National Surgical Quality Improvement Program outcome measures®
- The number of selected procedures hospital outpatient surgical departments perform
- Patient survey data for ambulatory surgical centers and hospital outpatient departments
- View hospital survey (inspection) reports

The Additional Information section of Hospital Compare provides links to Hospital Compare data and data for the following payment programs:
- Hospital Compare data last updated July 24, 2019
- Explore and download Hospital Compare data. Updated July 2019.
- Get data from Medicare programs that link quality to payment.
  - Hospital Readmissions Reduction Program (HRRP) Updated February 2019
  - Hospital Value-Based Purchasing Program (HVBP) Updated February 2019
  - Hospital-Acquired Condition (HAC) Reduction Program Updated February 2019
  - Comprehensive Care for Joint Replacement Model Updated July 2019

The following **Specification Manuals** are available on QualityNet.org:
- Specifications Manual for Hospital Inpatient Quality (IQR) Measures
- Hospital Outpatient Quality Reporting (OQR) Specifications Manual
- Ambulatory Surgical Center Quality Reporting Specifications Manual
- Specification Resources for IPFQR Program Measures

Acronym Index

The following acronyms are used within this data dictionary and in the corresponding downloadable databases (CSV flat files – Revised):

Acronym	Meaning
ASC	Ambulatory Surgical Center
ASCQR	Ambulatory Surgical Center Quality Reporting
AMI	Acute Myocardial Infarction
AVG	Average
CABG	Coronary Artery Bypass Graft
CAUTI	Catheter-associated urinary tract infections
CDI	*Clostridium difficile* Infection
CEBP	Clinical Episode Based Purchasing
CJR	Comprehensive Care Joint Replacement
CLABSI	Central line-associated bloodstream infections
COMP	Complications
COPD	Chronic Obstructive Pulmonary Disease
DoD	Department of Defense
ED	Emergency Department
EDAC	Excess days in acute care
FTNT	Footnote
HACRP	Hospital-Acquired Conditions Reduction Program
HAI	Healthcare-Associated Infections
HBIPS	Hospital-Based Inpatient Psychiatric Services
HCAHPS	Hospital Consumer Assessment of Healthcare Providers and Systems
HF	Heart Failure
HIP-KNEE	Total Hip/Knee Arthoplasty
HIT	Health Information Technology
HRRP	Hospital Readmissions Reduction Program
HVBP	Hospital Value-Based Purchasing
IMG	Imaging
IMM	Immunization
IPFQR	Inpatient Psychiatric Facility Quality Reporting
IQR	Inpatient Quality Reporting
MORT	Mortality
MRSA	Methicillin-Resistant *Staphylococcus aureus*
MSPB	Medicare Spending per Beneficiary (also referred to as SPP for Spending Per Patient)
MSA	Metropolitan Statistical Area
MSR	Measure
MPV	Medicare Payment and Volume
NQF	National Quality Forum
OAS CAHPS	Outpatient and Ambulatory Surigical Center Consumer Assessment of Healthcare Providers and Systems
OCM	Oncology Care Measures
OIE	Outpatient Imaging Efficiency
OP	Outpatient
OQR	Outpatient Quality Reporting
PCHQR	PPS-Exempt Cancer Hospital Quality Reporting
PN	Pneumonia
PRO	Patient reported outcomes
PSI	Patient Safety Indicators
READM	Readmissions
SEP	Sepsis
SM	Structural Measures

SMD	Screening for Metabolic Disorder
SPP	Spending per Patient (also referred to as MSPB for Medicare Spending per Beneficiary)
STK	Stroke
THA	Total Hip Arthroplasty
TKA	Total Knee Arthroplasty
TR	Transition Record
TPS	Total Performance Score
TRISS	TRICARE Inpatient Satisfaction Surveys
VA	Veterans Administration
VHA	Veterans Health Administration
VOC	Value of care
VTE	Venous Thromboembolism

Measure Descriptions and Reporting Cycles

Data for each measure set are collected in differing time frames from various quality measurement contractors. Additional information about the measure update frequency/refresh schedule and data collection periods can be found in the Measures and Current Data Collection Periods section of the Hospital Compare website. Below is a brief description of the collection processes and reporting cycles for each measure set included on Hospital Compare:

Name	General Information: Overall Rating
Description/ Background	The Overall Hospital Ratings are designed to assist patients, consumers, and others in comparing hospitals side-by-side. The Overall Hospital Ratings show the quality of care a hospital may provide compared to other hospitals based on the quality measures reported on Hospital Compare. The Overall Hospital Rating summarizes more than 60 measures reported on Hospital Compare into a single rating. The measures come from the IQR, OQR, and other programs and encompass measures in seven measure groups: mortality, safety of care, readmission, patient experience, effectiveness of care, timeliness of care, and efficient use of medical imaging. The hospitals can receive between one and five stars, with five stars being the highest rating, and the more stars, the better the hospital performs on the quality measures. Most hospitals will display a three star rating. For more information, go to the Hospital Compare overall hospital ratings section. For more information regarding the methodology, go to the QualityNet.org Overall Hospital Ratings Methodology section.
Reporting Cycle	Data collection period will vary by measure, and will be updated annually.

Name	General Information: Structural Measures
Description/ Background	As part of the general information available through CMS, structural measures reflect the environment in which providers care for patients. Examples of structural measures can be inpatient (participation in general surgery registry) or outpatient (tracking clinical results between visits). Hospitals submit structural measure data using an online data entry tool made available to hospitals and their vendors. Structural measures include information provided by the American College of Surgeons (ACS), the Society of Thoracic Surgeons (STS), the Joint Commission (TJC), and CMS.
Reporting Cycle	Collection period: 12 months. Refreshed annually, except the ACS Registry which is refreshed quarterly.

Name	General Information: Health Information Technology (HIT) Measures
Description/ Background	As part of the general information available through CMS, hospitals submit HIT measure data which is part of the Electronic Health Record (EHR) Incentive Program. The HIT measures include hospitals' ability to receive lab results electronically and track patients' health information, including lab results, tests, and referrals electronically between visits. The data for hospitals who are using certified electonic health record technology to meet the requirements of meaningful use is available in the downloadable database files.
Reporting Cycle	Collection period: 12 months. Refreshed annually.

Name	Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Patient Survey
Description/ Background	The HCAHPS Patient Survey, also known as the CAHPS® Hospital Survey or Hospital CAHPS, is a survey instrument and data collection methodology for measuring patients' perceptions of their hospital experience. The survey is administered to a random sample of adult inpatients after discharge. The HCAHPS survey contains patient perspectives on care and patient rating items that encompass key topics: communication with hospital staff, responsiveness of hospital staff, pain management, communication about medicines, discharge information, cleanliness of hospital environment, quietness of hospital environment, and transition of care. The survey also includes screening questions and demographic items, which are used for adjusting the mix of patients across hospitals and for analytic purposes. See Appendix C – HCAHPS Survey Questions Listing section for a full list of current HCAHPS Survey items included in the Hospital Compare downloadable databases. More information about the HCAHPS Survey, including a complete list of survey questions, can be found on the official HCAHPS website.
Reporting Cycle	Collection period: 12 months. Refreshed quarterly.

Name	Timely and Effective Care: Process of Care Measures
Description/ Background	The measures of timely and effective care (also known as "process of care" measures) show the percentage of hospital patients who got treatments known to get the best results for certain common, serious medical conditions or surgical procedures; how quickly hospitals treat patients who come to the hospital with certain medical emergencies; and how well hospitals provide preventive services. These measures only apply to patients for whom the recommended treatment would be appropriate. The measures of timely and effective care apply to adults and children treated at hospitals paid under the Inpatient Prospective Payment System (IPPS) or the Outpatient Prospective Payment System (OPPS), as well as those that voluntarily report data on measures for whom the recommended treatments would be appropriate including: Medicare patients, Medicare managed care patients, and non-Medicare patients. Timely and effective care measures include severe sepsis and septic shock, cataract care follow-up, colonoscopy follow-up, heart attack care, emergency department care, preventive care, cancer care, blood clot prevention and pregnancy and delivery care measures. IMM-3 and OP-27 are combined and reported as one measure rather than listing the measures separately. The Measure ID IMM-3_OP-27 includes data from both the inpatient measure IMM-3, and the outpatient measure OP-27.
Reporting Cycle	Collection period: Approximately 12 months. Refreshed quarterly, except EDV-1, OP-22, OP-29, OP-30, OP-31, OP-33, IMM-2, and IMM-3 which are refreshed annually.

Name	Complications: Surgical Complications – Hip/Knee Measure
Description/ Background	The Centers for Medicare & Medicaid Services' (CMS's) publicly reported risk-standardized complication measure for elective primary total hip arthroplasty (THA) and/or total knee arthroplasty (TKA) assesses a broad set of healthcare activities that affect patients' well-being. The hip/knee complication rate is an estimate of complications within an applicable time period, for patients electively admitted for primary total hip and/or knee replacement.CMS measures the likelihood that at least 1 of 8 complications occurs within a specified time period: heart attack, (acute myocardial infarction [AMI]), pneumonia, or sepsis/septicemia/shock during the index admission or within 7 days of admission, surgical site bleeding, pulmonary embolism, or death during the index admission or within 30 days of admission, or mechanical complications or periprosthetic joint infection/wound infection during the index admission or within 90 days of admission. Hospitals' rates of hip/knee complications are compared to the national rate to determine if hospitals' performance on this measure is better than the national rate (lower), no different than the national rate, or worse than the national rate (higher). Rates are provided in the downloadable databases as decimals and typically indicate information that is presented on the Hospital Compare website as percentages. Lower rates for surgical complications are better. CMS chose to measure these complications within the specified times because complications over a longer period may be impacted by factors outside the hospitals' control like other complicating illnesses, patients' own behavior, or care provided to patients after discharge. This measure is separate from the serious complications measure (also reported on Hospital Compare). The THA/TKA Methodology for this dataset is available on QualityNet.org
Reporting Cycle	Collection period: 36 months. Refreshed annually.

Name	Complications: Surgical Complications – CMS Patient Safety Indicators (PSIs)
Description/ Background	Measures of serious complications are drawn from the Agency for Healthcare Research and Quality (AHRQ) Patient Safety Indicators (PSIs). The overall score for serious complications is based on how often adult patients had certain serious, but potentially preventable, complications related to medical or surgical inpatient hospital care. The CMS PSIs reflect quality of care for hospitalized adults and focus on potentially avoidable complications and iatrogenic events. CMS PSIs only apply to Medicare beneficiaries who were discharged from a hospital paid through the IPPS. These indicators are risk adjusted to account for differences in hospital patients' characteristics. CMS calculates rates for CMS PSIs using Medicare claims data and a statistical model that determines the interval estimates for the PSIs. CMS publicly reports data on two PSIs—PSI-4 (death rate among surgical patients with serious treatable complications) and the composite measure PSI-90. PSI-90 is composed of 11 NQF-endorsed measures, including PSI-3 (pressure ulcer rate), PSI-6 (iatrogenic pneumothorax rate), PSI-8 (postoperative hip fracture rate), PSI-9 (postoperative hemorrhage or hematoma rate), PSI-10 (postoperative physiologic and metabolic derangement rate), PSI-11 (postoperative respiratory failure rate), PSI-12 (postoperative pulmonary embolism or deep vein thrombosis rate), PSI-13 (postoperative

sepsis rate), PSI-14 (postoperative wound dehiscence rate), and PSI-15 (accidental puncture or laceration rate). PSI-90's composite rate is the weighted average of its component indicators. Hospitals' PSI rates are compared to the national rate to determine if hospitals' performance on PSIs is better than the national rate (lower), no different than the national rate, or worse than the national rate (higher).

Please note that the Patient Safety Indicator (PSI)-90 data were not refreshed in July 2017. The data were updated as part of the October 2017 release. Diagnosis coding switched from ICD-9 to ICD-10 in 2015. Data for the FY 2018 recalibrated PSI measures only represent the 15-month performance period of ICD-9 claims (7/1/14 to 9/30/15).

Reporting Cycle	Collection period: 24 months. Refreshed annually.

Name	Complications: Healthcare-Associated Infections (HAI) Measures
Description/ Background	To receive payment from CMS, hospitals are required to report data about some infections to the Centers for Disease Control and Prevention's (CDC's) National Healthcare Safety Network (NHSN). The HAI measures show how often patients in a particular hospital contract certain infections during the course of their medical treatment, when compared to like hospitals. HAI measures provide information on infections that occur while the patient is in the hospital and include: central line-associated bloodstream infections (CLABSI), catheter-associated urinary tract infections (CAUTI), surgical site infection (SSI) from colon surgery or abdominal hysterectomy, methicillin-resistant *Staphylococcus Aureus* (MRSA) blood laboratory-identified events (bloodstream infections), and *Clostridium difficile* (*C.diff.*) laboratory-identified events (intestinal infections). The HAI measures show how often patients in a particular hospital contract certain infections during the course of their medical treatment, when compared to like hospitals. The CDC calculates a Standardized Infection Ratio (SIR) which may take into account the type of patient care location, number of patients with an existing infection, laboratory methods, hospital affiliation with a medical school, bed size of the hospital, patient age, and classification of patient health. SIRs are calculated for the hospital, the state, and the nation. Hospitals' SIRs are compared to the national benchmark to determine if hospitals' performance on these measures is better than the national benchmark (lower), no different than the national benchmark, or worse than the national benchmark (higher). The HAI measures apply to all patients treated in acute care hospitals, including adult, pediatric, neonatal, Medicare, and non-Medicare patients.
Reporting Cycle	Collection period: 12 months. Refreshed quarterly.

Name	Complications: 30-Day Mortality Measures
Description/ Background	The 30-day death measures are estimates of deaths within 30-days of a hospital admission from any cause related to medical conditions, including heart attack (AMI), heart failure (HF), pneumonia (PN), chronic obstructive pulmonary disease (COPD), and stroke; as well as surgical procedures, including cornary artery bypass graft (CABG). Hospitals' rates are compared to the national rate to determine if hospitals' performance on these measures is better than the national rate (lower), no different than the national rate, or worse than the national rate (higher). For some hospitals, the number of cases is too small to reliably compare their results to the national average rate. CMS chose to measure death within 30 days instead of inpatient deaths to use a more consistent measurement time window because length of hospital stay varies across patients and hospitals. Rates are provided in the downloadable databases as decimals and typically indicate information that is presented on the Hospital Compare website as percentages. Lower percentages for readmission and mortality are better.

The Mortality Measure Methodology Reports are available on QualityNet.org. |
| Reporting Cycle | Collection period: 36 months for all measures. |

Name	Unplanned hospital visits: 30-Day Readmissions
Description/ Background	The 30-day unplanned readmission measures are estimates of unplanned readmission to any acute care hospital within 30 days of discharge from a hospitalization for any cause related to medical conditions, including heart attack (AMI), heart failure (HF), pneumonia (PN), chronic obstructive pulmonary disease (COPD), and stroke (STK); and surgical procedures, including hip/knee replacement and cornary artery bypass graft (CABG), and colonoscopy procedures. The 30-day unplanned hospital-wide readmission measure focuses on whether patients who were discharged from a hospitalization were hospitalized again within 30 days. The hospital-wide readmission measure includes all medical, surgical and gynecological, neurological,

cardiovascular, and cardiorespiratory patients. The outpatient colonoscopy measure is the facility 7-day risk standardized hospital visit rate after outpatient colonoscopy. Hospitals' rates are compared to the national rate to determine if hospitals' performance on these measures are better than the national rate (lower), no different than the national rate (the same), or worse than the national rate (higher). For some hospitals, the number of cases is too small to reliably compare their results to the national average rate. Rates are provided in the downloadable databases as decimals and typically indicate information that is presented on the Hospital Compare website as percentages. Lower percentages for readmission are better.

The Readmissions Measure Methodology Reports are available QualityNet.org.

| Reporting Cycle | Collection period: 36 months for all measures, except 12 months for READM-30-HOSP-WIDE. Refreshed annually.
Collection period for OP-32 is 12 months. Refreshed annually. |

Name	**Unplanned hospital visits: EDAC Measures**
Description/ Background	The readmission measures are estimates of the rate of unplanned readmission to an acute care hospital in the 30 days after discharge from a hospitalization. The hospital return days measures add up the number of days patients spent back in the hospital (in the emergency department, under observation, or in an inpatient unit) within 30 days after they were first treated and released for AMI and HF. The measures compare each hospital's return days to results from an average hospital with similar patients to determine if this hospital has more, similar, or fewer days than average The EDAC Measure Methodology Reports are available on QualityNet.org
Reporting Cycle	Collection period: 36 months for all measures, and are refreshed annually.

Name	**Use of Medical Imaging: Outpatient Imaging Efficiency (OIE)**
Description/ Background	CMS has adopted six measures which capture the quality of outpatient care in the area of imaging. CMS notes that the purpose of these measures is to promote high-quality efficient care. Each of the measures currently utilize both the Hospital OPPS claims and Physician Part B claims in the calculations. These calculations are based on the administrative claims of the Medicare fee-for-service population. Hospitals do not submit additional data for these measures. The measures on the use of medical imaging show how often a hospital provides specific imaging tests for Medicare beneficiaries under circumstances where they may not be medically appropriate. Lower percentages suggest more efficient use of medical imaging. The purpose of reporting these measures is to reduce unnecessary exposure to contrast materials and/or radiation, to ensure adherence to evidence-based medicine and practice guidelines, and to prevent wasteful use of Medicare resources. The measures only apply to Medicare patients treated in hospital outpatient departments.
Reporting Cycle	Collection period: 12 months. Refreshed annually.

Name	**Payment and Value of Care Measures**
Description/ Background	The Medicare Spending Per Beneficiary (MSPB-1) Measure assesses Medicare Part A and Part B payments for services provided to a Medicare beneficiary during a spending-per-beneficiary episode that spans from three days prior to an inpatient hospital admission through 30 days after discharge. The payments included in this measure are price-standardized and risk-adjusted. The payment measures for heart attack, heart failure, pneumonia, and hip/knee replacement include the payments made for Medicare beneficiaries who are 65 years and older. The measures add up payments made for care and supplies starting the day the patient enters the hospital and for the next 30 days or 90 days for hip/knee replacement. The measures are meant to reflect differences in the services and supplies provided to patients. Hospital results are provided in the downloadable databases for the heart attack, heart failure, pneumonia, and hip/knee replacement payment measures. You can see whether the payments made for patients treated at a particular hospital is less than, no different than, or greater than the national average payment. For some hospitals, the number of cases is too small to reliably compare their results to the national average payment.

	The [Payment Measure Methodology Reports](#) and [MSBP Measure Methodology Reports](#) are available on QualityNet.org.
Reporting Cycle	Collection Period: 12 months for MSPB-1 and CEBP measures, and 36 months for the payment for heart attack (PAYM-30-AMI), heart failure (PAYM-30-HF), pneumonia (PAYM-30-PN) measures, and hip/knee replacement (PAY-90-HIP-KNEE). All measures are refreshed annually.

Name	Clinical Epsidode Based Payment Measures (CEBP)
Description/ Background	The Clinical Epsidode Based Payment (CEBP) measures (Conditions: Cellulitis, Kidney/Urinary Tract Infection, Gastrointestinal Hemorrhage; Procedures: Aortic Aneurysm, Spinal Fusion, Cholecystectomy and Common Duct Exploration) show whether Medicare spends more, less, or about the same on an episode of care for a Medicare patient treated in a specific inpatient hospital compared to how much Medicare spends on an episode of care for the respective condition or procedure across all inpatient hospitals nationally. This measure takes into account important factors like patient age and health status (risk adjustment) and geographic payment differences (payment-standardization). The CEBP measues are only available in the Downloadable Database set.
Reporting Cycle	Collection Period: 12 months for CEBP measures. All measures are refreshed annually.

Name	Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program
Description/ Background	The IPFQR Program is a pay-for-reporting program intended to provide consumers with quality of care information to make more informed decisions about health care options. To meet the IPFQR Program requirements, Inpatient Psychiatric Facilities (IPFs) are required to submit all quality measures, tobacco use measures, and immuziations measures to CMS. The IPFQR Program measures allow consumers to find and compare the quality of care given at psychiatric facilities where patients are admitted as inpatients. Inpatient psychiatric facilities are required to report data on these measures. Facilities that are eligible for this program may have their Medicare payments reduced if they do not report.
Reporting Cycle	Collection period: 12 months. Refreshed annually.

Name	Prospective Payment System (PPS)-Exempt Cancer Hospital Quality Reporting (PCHQR) Program
Description/ Background	The PPS-Exempt Cancer Hospital Quality Reporting Program measures allow consumers to find and compare the quality of care provided at the eleven PPS-exempt cancer hospitals participating in the program. Under the PCHQR Program, cancer hospitals submit data to CMS for Cancer-specific Treatment Measures: Adjuvant Chemotherapy Colon Cancer (PCH-1), Combination Chemotherapy Breast Cancer (PCH-2), and Adjuvant Hormone Therapy Breast Cancer (PCH-3) measures. PPS-Exempt Cancer Hospitals also submit the following HCAHPS measures: Composite 1 (Q1 to Q3), Composite 2 (Q5 to Q7), Composite 3 (Q4 & Q11), Composite 4 (Q13 & Q14), Composite 5 (Q16 & Q17), Composite 6 (Q19 & Q20), Composite 7 (Q23 to Q25),Q21, Q 22, the star ratings and linear score PPS-Excempt Cancer Hospitals submit Oncology Care Measures (PCH -14 through PCH -18). PPS-Excempt Cancer Hospitals additionally submit a Clinical Effectiveness Measure (PCH -25).
Reporting Cycle	Collection period: 12 months for the PCH and Composite HCAHPS measures. PCH measures are refresed annually. Composite HCAHPS measures are refreshed quarterly.

Name	Ambulatory Surgical Center Quality Reporting (ASCQR) Program
Description/ Background	The Ambulatory Surgical Center Quality Reporting (ASCQR) Program is a quality measure data reporting program implemented by the Centers for Medicare & Medicaid Services (CMS) for care provided in the ambulatory surgical center (ASC) setting. ASCs are health care facilities that perform surgeries and procedures outside the hospital setting. The ASCQR Program exists to promote higher quality, more efficient health care for Medicare beneficiaries through data reporting, quality improvement, and measure alignment with other clinical care settings. To participate in the program, an ASC must submit quality measure data. Once an ASC submits quality measure data under the ASCQR Program for any of the ASCQR measures, the ASC is considered to be participating in the program. ASCs that participate in the program and meet program requirements are rewarded based on the quality of care that they provide to patients. The program operates by (1) awarding ASCs that meet program requirements with an annual payment, and (2) reducing the annual payment by two percent for ASCs that do not participate in the program, or fail to meet program requirements for the ten ASC measures.
Reporting Cycle	Collection period: 6 months (ASC-8); 12 months (ASC-1, -2, -3, -4, -5, -6, -7, -9, -10, -11, & -12). Refreshed annually.

Name	Linking Quality to Payment: Hospital-Acquired Conditions Reduction Program (HACRP)
Description/ Background	The Hospital-Acquired Condition Reduction Program (HACRP) was established in 2010 to provide an incentive for hospitals to reduce HACs. CMS adopted the AHRQ PSI-90 composite measure, the CDC NHSN central line-associated blood stream infection (CLABSI) measure, the CDC NHSN catheter-associated urinary tract infection (CAUTI) measure, the Surgical Site Infection (SSI) (colon and hysterectomy) measure, Methicillin-Resistant *Staphylococcus aureus* Bacteremia (MRSA), and *Clostridium difficile* Infection (CDI) as part of HACRP. The overall score for serious complication is based on how adult patients who had certain serious, but potentially preventable, complications related to medical or surgical inpatient hospital care scored on the individual measures. Details regarding the HACRP Overview and Scoring Methodology are available on QualityNet.org.
Reporting Cycle	Collection Period: 15 months (HACRP Domain 1 Score, and PSI-90); 24 months (HACRP Domain 2 Score, CAUTI, CDI, CLABSI, MRSA and SSI); 30 months (Total HAC Score). Refreshed Annually.

Name	Linking Quality to Payment: Hospital Readmissions Reduction Program (HRRP)
Description/ Background	In October 2012, CMS began reducing Medicare payments for IPPS hospitals with excess readmissions. Excess readmissions are measured using a ratio, by dividing a hospital's number of "predicted" 30-day readmissions for AMI, CABG, COPD, HF, hip/knee replacement, and PN, by the number that would be "expected," based on an average hospital with similar patients. A ratio greater than one indicates excess readmissions. The calculations include only acute care hospitals paid under IPPS and Maryland hospitals. The HRRP Overview is available on QualityNet.org.
Reporting Cycle	Collection period: 36 months. Refreshed annually.

Name	Linking Quality to Payment: Hospital Value-Based Purchasing (HVBP) Program
Description/ Background	The HVBP program is part of CMS' long-standing effort to link Medicare's payment system to quality. The program implements value-based purchasing to the payment system that accounts for the largest share of Medicare spending, affecting payment for inpatient stays in over 3,000 hospitals across the country. Hospitals are paid for inpatient acute care services based on the quality of care, not just quantity of the services they provide. The Fiscal Year 2018 HVBP program adjusts hospitals' payments based on their performance on four domains that reflect hospital quality: (1) Clinical Care, (2) Patient- and Caregiver- Centered Experience of Care/Care Coordination, (3) Safety, and (4) Efficiency and Cost Reduction. The domains consist of measures for Safety, Patient Experience of Care, Clinical Care Outcomes, Perinatal Outcomes, and Efficiency. The Total Performance Score (TPS) is comprised of the scores from the following domains: Clinical Care domain score (weighted as 25 percent of the TPS), the Patient- and Caregiver-Centered Experience of Care/Care Coordination domain score (weighted as 25 percent of the TPS), the Safety domain score (weighted as 25 percent of the TPS), and the Efficiency and Cost Reduction domain score (weighted as 25 percent of the TPS). The HVBP measure dates are available in Appendix F – HVBP Meaure dates; the HVBP Overview and Measures are available on QualityNet.org.
Reporting Cycle	Collection period: 12 months for Patient- and Caregiver- Centered Experience of Care/Care Cordination domain, and for Efficiency and Cost Reduction domain, 12 months and 15 months for Safety domain measures (AHRQ, HAI, and PC-01), and 33 months for Clinical Care domain. Refreshed annually.

Name	Linking Quality to Payment: HVBP Payment Adjustments
Description/ Background	The Inpatient HVBP Program adjusts Medicare's payments to reward hospitals based on the quality of care that they provide to patients. The program operates by first reducing participating hospitals' Medicare payments by a specified percentage, then by using the estimated total amount of those payment reductions to fund value-based incentive payments to hospitals based on their performance under the program.
Reporting Cycle	Collection period: Approximately 12 months. Refreshed annually.

Name	Comprehensive Care for Joint Replacement Model
Description/ Background	The Comprehensive Care for Joint Replacement (CJR) model encourages physicians, hospitals, and post-acute care providers to work together to improve quality of care for patients undergoing hip and knee replacement inpatient surgeries. This model tests bundled payment and quality measurement for an episode of care associated with hip and knee replacements to encourage hospitals, physicians, and post-acute care providers to work together to improve the quality and coordination of care from the initial hospitalization through recovery. The CJR model tracks two quality measures during an episode of care: • Complication rate for hip/knee replacement patients (Hospital-level risk-standardized complication rate [RSCR] following Total Hip Arthroplasty [THA] and/or Total Knee Arthroplasty [TKA]]) (NQF #1550) • Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Survey (NQF #0166), calculated as an HCAHPS Linear Mean Roll-Up Score The CJR model also encourages hospitals to voluntarily submit data on patient-reported outcomes (PROs) for patients undergoing hip/knee replacements (THA/TKA PROs) and limited data on risk variables (race and ethnicity, body mass index [BMI] or weight and height, and patient health literacy).
Reporting Cycle	Collection period: CJR HCAHPS – 12 months, refreshed annually, CJR Hip/Knee Complications – 36 months. Refreshed annually. PRO data is refreshed annually.

Name	Outpatient and Ambulatory Surgical Center Consumer Assessment of Healthcare Providers and Systems (OAS CAHPS) Patient Survey
Description/ Background	The OAS CAHPS® Patient Survey is a survey instrument and data collection methodology for measuring patients' perceptions of their outpatient and ambulatory surgical center experience. The survey is administered to a random sample of adult outpatient patientsafter discharge. The OAS CAHPS survey contains patient perspectives on care and patient rating items that encompass key topics: communication with facility staff, responsiveness of facility staff, pain management, communication about medicines, discharge information, cleanliness of facility environment, quietness of facility environment, and transition of care. The survey also includes screening questions and demographic items, which are used for adjusting the mix of patients across facilities and for analytic purposes. See the Appendix D – OAS CAHPS Survey Questions section for a full list

	of current OAS CAHPS Survey items included in the Hospital Compare downloadable databases. More information about the OAS CAHPS Survey, including a complete list of survey questions, can be found on the official OAS CAHPS website.	
Reporting Cycle	Collection period: 12 months. Refreshed quarterly.	

Measure Dates

The downloadable databases are refreshed within 24 hours of the Hospital Compare data update and this update will be indicated in the Additional Information section of the Hospital Compare home page. The Measure Dates file located within the downloadable databases contains a comprehensive listing of all measures displayed on Hospital Compare, their start quarters and dates, and their end quarters and dates. A sample of the collection periods from the July 2019 Measure Dates file is shown below:

Measure_ID	Measure_Start_Quarter	Measure_Start_Date	Measure_End_Quarter	Measure_End_Date

File Summary

The table below shows the titles of all .CSV Revised file names included in the downloadable database. A "Hospital.pdf" (Data Dictionary) file is included with the downloadable databases format. Please note that the Data Updates file and ACS NSQIP dataset are only available on data.medicare.gov and not in the Downloadable Database .CSV files. Archived datasets contain the Access databases from May 2005 – July 2016.

Downloadable Database Content Summary

CSV Flat Files Note: Opening CSV files in Excel will remove leading zeroes from data fields. Since some data, such as provider numbers, contain leading zeroes, it is recommended that you open CSV files using text editor programs such as Notepad to copy or view CSV file content. Fields having the data type of "Memo" do not require a length. They allow the user to input large amounts of text without limit. Fields having the data type of "Char" require the corresponding length provided. The CSV column names and file names should mirror the datasets found on Data.Medicare.gov.

General Information

Table (Back to *File Summary*)	Structural Measures (Hospital)
Description	Hospital-level results for structural measures

Appendix A – Hospital Compare Measures

The following crosswalk contains a listing of all measures located at the hospital-level files of the Downloadable Databases CSV Flat Files – Revised. The tables below display the locations of each measure within the CSV files, including an HVBP file directory:

CSV	Structural Measures – Hospital.csv
Measure ID	**Measure Name**
SM_SS_CHECK	Uses Inpatient Safe Surgery Checklist (alternate Measure ID SM-5)
SM-HS-PATIENT-SAF	Uses hospital survey on patient safety culture (SM-6)
OP-12	Able to receive lab results electronically (HIT measure)
OP-17	Able to track patients' lab results, tests, and referrals electronically between visits (HIT measure)
OP-25	Uses outpatient safe surgery checklist

CSV	Hospital General Information.csv
Measure ID	**Measure Name**
Meets criteria for meaningful use of EHRs	Meets criteria for meaningful use of EHRs
Overall Hospital Rating	Overall Rating
Mortality national comparison	Mortality
Safety of care national comparison	Safety of Care
Readmission national comparison	Readmission
Patient experience national comparison	Patient Experience
Effectiveness of care national comparison	Effectiveness of Care
Timeliness of care national comparison	Timeliness of Care
Efficient use of medical imaging national comparison	Effective use of Medical Imaging

CSV	HCAHPS –Hospital.csv
Measure ID	**Measure Name**
H-CLEAN-HSP-A-P	Patients who reported that their room and bathroom were "Always" clean
H-CLEAN-HSP-SN-P	Patients who reported that their room and bathroom were "Sometimes" or "Never" clean
H-CLEAN-HSP-U-P	Patients who reported that their room and bathroom were "Usually" clean
H-CLEAN-HSP-STAR-RATING	Cleanliness - star rating
H_CLEAN_LINEAR_SCORE	Cleanliness - linear mean score
H-COMP-1-A-P	Patients who reported that their nurses "Always" communicated well
H-COMP-1-SN-P	Patients who reported that their nurses "Sometimes" or "Never" communicated well
H-COMP-1-U-P	Patients who reported that their nurses "Usually" communicated well
H-COMP-1-STAR-RATING	Nurse communication - star rating
H_COMP_1_LINEAR_SCORE	Nurse communication - linear mean score

CSV	HCAHPS –Hospital.csv
Measure ID	**Measure Name**
H-COMP-2-A-P	Patients who reported that their doctors "Always" communicated well
H-COMP-2-SN-P	Patients who reported that their doctors "Sometimes" or "Never" communicated well
H-COMP-2-U-P	Patients who reported that their doctors "Usually" communicated well
H-COMP-2-STAR-RATING	Doctor communication - star rating
H_COMP_2_LINEAR_SCORE	Doctor communication - linear mean score
H-COMP-3-A-P	Patients who reported that they "Always" received help as soon as they wanted
H-COMP-3-SN-P	Patients who reported that they "Sometimes" or "Never" received help as soon as they wanted
H-COMP-3-U-P	Patients who reported that they "Usually" received help as soon as they wanted
H-COMP-3-STAR-RATING	Staff responsiveness - star rating
H_COMP_3_LINEAR_SCORE	Staff responsiveness - linear mean score
H-COMP-5-A-P	Patients who reported that staff "Always" explained about medicines before giving it to them
H-COMP-5-SN-P	Patients who reported that staff "Sometimes" or "Never" explained about medicines before giving it to them
H-COMP-5-U-P	Patients who reported that staff "Usually" explained about medicines before giving it to them
H-COMP-5-STAR-RATING	Communication about medicine - star rating
H_COMP_5_LINEAR_SCORE	Communication about medicines - linear mean score
H-COMP-6-N-P	Patients who reported that NO, they were not given information about what to do during their recovery at home
H-COMP-6-Y-P	Patients who reported that YES, they were given information about what to do during their recovery at home
H-COMP-6-STAR-RATING	Discharge information - star rating
H_COMP_6_LINEAR_SCORE	Discharge information - linear mean score
H-COMP-7-A	Patients who "Agree" they understood their care when they left the hospital
H-COMP-7-D-SD	Patients who "Disagree" or "Strongly Disagree" that they understood their care when they left the hospital
H-COMP-7-SA	Patients who "Strongly Agree" that they understood their care when they left the hospital
H-COMP-7-STAR-RATING	Care transition - star rating
H_COMP_7_LINEAR_SCORE	Care transition - linear mean score
H-HSP-RATING-0-6	Patients who gave their hospital a rating of 6 or lower on a scale from 0 (lowest) to 10 (highest)
H-HSP-RATING-7-8	Patients who gave their hospital a rating of 7 or 8 on a scale from 0 (lowest) to 10 (highest)
H-HSP-RATING-9-10	Patients who gave their hospital a rating of 9 or 10 on a scale from 0 (lowest) to 10 (highest)
H-HSP-RATING-STAR-RATING	Overall rating of hospital - star rating
H_HSP_RATING_LINEAR_SCORE	Overall hospital rating - linear mean score
H-QUIET-HSP-A-P	Patients who reported that the area around their room was "Always" quiet at night
H-QUIET-HSP-SN-P	Patients who reported that the area around their room was "Sometimes" or "Never" quiet at night
H-QUIET-HSP-U-P	Patients who reported that the area around their room was "Usually" quiet at night
H-QUIET-HSP-STAR-RATING	Quietness - star rating
H_QUIET_LINEAR_SCORE	Quietness - linear mean score

CSV	HCAHPS –Hospital.csv
Measure ID	**Measure Name**
H-RECMND-DN	Patients who reported NO, they would probably not or definitely not recommend the hospital
H-RECMND-DY	Patients who reported YES, they would definitely recommend the hospital
H-RECMND-PY	Patients who reported YES, they would probably recommend the hospital
H-RECMND-STAR-RATING	Recommend hospital - star rating
H_RECMND_LINEAR_SCORE	Recommend hospital - linear mean score
H-STAR-RATING	Summary star rating

CSV	Timely and Effective Care – Hospital.csv
Measure ID	**Measure Name**
ED-1b	Average (median) time patients spent in the emergency department, before they were admitted to the hospital as an inpatient (alternate Measure ID: ED-1)
ED-2b	Average (median) time patients spent in the emergency department, after the doctor decided to admit them as an inpatient before leaving the emergency department for their inpatient room (alternate Measure ID: ED-2)
EDV	Emergency department volume (alternate Measure ID: EDV-1)
IMM-2	Patients assessed and given influenza vaccination
IMM-3	Healthcare workers given influenza vaccination (alternate Measure ID: IMM-3_OP_27_FAC_ADHPCT)
OP-2	Outpatients with chest pain or possible heart attack who got drugs to break up blood clots within 30 minutes of arrival
OP-3b	Average (median) number of minutes before outpatients with chest pain or possible heart attack who needed specialized care were transferred to another hospital
OP-5	Average (median) number of minutes before outpatients with chest pain or possible heart attack got an ECG
OP-18b	Average (median) time patients spent in the emergency department before leaving from the visit (alternate Measure ID: OP-18)
OP-18c	Average time patients spent in the emergency department before being sent home (Median Time from ED Arrival to ED Departure for Discharged ED Patients – Psychiatric/Mental Health Patients) *This measure is only found in the downloadable database, it is not displayed on Hospital Compare
OP-22	Percentage of patients who left the emergency department before being seen
OP-23	Percentage of patients who came to the emergency department with stroke symptoms who received brain scan results within 45 minutes of arrival
OP-29	Percentage of patients receiving appropriate recommendation for follow-up screening colonoscopy
OP-30	Percentage of patients with history of polyps receiving follow-up colonoscopy in the appropriate timeframe
OP-31	Percentage of patients who had cataract surgery and had improvement in visual function within 90 days following the surgery
OP-33	Percentage of patients receiving appropriate radiation therapy for cancer that has spread to the bone
PC-01	Percent of mothers whose deliveries were scheduled too early (1-2 weeks early), when a scheduled delivery was not medically necessary
SEP-1	Severe Sepsis and Septic Shock
VTE-6	Patients who developed a blood clot while in the hospital who did not get treatment that could have prevented it

CSV	Complications and Deaths – Hospital.csv
Measure ID	Measure Name
COMP-HIP-KNEE	Rate of complications for hip/knee replacement patients
PSI-90	Serious complications (this is a composite or summary measure; alternate Measure ID: PSI-90-SAFETY)
PSI-3	Pressure sores (alternate Measure ID: PSI_3_Ulcer)
PSI-4	Deaths among patients with serious treatable complications after surgery (alternate Measure ID: PSI-4-SURG-COMP)
PSI-6	Collapsed lung due to medical treatment (alternate Measure ID: PSI-6-IAT-PTX)
PSI-8	Broken hip from a fall after surgery (alternate Measure ID: PSI_8_POST_HIP)
PSI-9	Bleeding or bruising during surgery (alternate Measure ID: PSI_9_POST_HEM)
PSI-10	Kidney and diabetic complications after surgery (alternate Measure ID: PSI_10_POST_KIDNEY)
PSI-11	Respiratory failure after surgery (alternate Measure ID: PSI_11_POST_RESP)
PSI-12	Serious blood clots after surgery (alternate Measure ID: PSI-12-POSTOP-PULMEMB-DVT)
PSI-13	Blood stream infection after surgery (alternate Measure ID: PSI_13_POST_SEPSIS)
PSI-14	A wound that splits open after surgery on the abdomen or pelvis (alternate Measure ID: PSI-14-POSTOP-DEHIS)
PSI-15	Accidental cuts and tears from medical treatment (alternate Measure ID: PSI-15-ACC-LAC)
MORT-30-AMI	Death rate for heart attack patients
MORT-30-CABG	Death rate for Coronary Artery Bypass Graft (CABG) surgery patients
MORT-30-COPD	Death rate for chronic obstructive pulmonary disease (COPD) patients
MORT-30-HF	Death rate for heart failure patients
MORT-30-PN	Death rate for pneumonia patients
MORT-30-STK	Death rate for stroke patients

CSV	CMS_PSI_6_decimal_file.csv
Measure ID	Measure Name
PSI-90	Serious complications (this is a composite or summary measure; alternate Measure ID: PSI-90-SAFETY)
PSI-3	Pressure sores (alternate Measure ID: PSI_3_Ulcer)
PSI-6	Collapsed lung due to medical treatment (alternate Measure ID: PSI-6-IAT-PTX)
PSI-8	Broken hip from a fall after surgery (alternate Measure ID: PSI_8_POST_HIP)
PSI-9	Bleeding or bruising during surgery (alternate Measure ID: PSI_9_POST_HEM)
PSI-10	Kidney and diabetic complications after surgery (alternate Measure ID: PSI_10_POST_KIDNEY)
PSI-11	Respiratory failure after surgery (alternate Measure ID: PSI_11_POST_RESP)
PSI-12	Serious blood clots after surgery (alternate Measure ID: PSI-12-POSTOP-PULMEMB-DVT)
PSI-13	Blood stream infection after surgery (alternate Measure ID: PSI_13_POST_SEPSIS)
PSI-14	A wound that splits open after surgery on the abdomen or pelvis (alternate Measure ID: PSI-14-POSTOP-DEHIS)
PSI-15	Accidental cuts and tears from medical treatment (alternate Measure ID: PSI-15-ACC-LAC)

CSV	Healthcare Associated Infections – Hospital.csv
Measure ID	Measure Name
HAI-1	Central line-associated bloodstream infections (CLABSI) in ICUs and select wards (alternate Measure ID: HAI_1_SIR)
HAI-2	Catheter-associated urinary tract infections (CAUTI) in ICUs and select wards (alternate Measure ID: HAI_2_SIR)
HAI-3	Surgical Site Infection from colon surgery (SSI: Colon) (alternate Measure ID: HAI_3_SIR)
HAI-4	Surgical Site Infection from abdominal hysterectomy (SSI: Hysterectomy) (alternate Measure ID: HAI_4_SIR)
HAI-5	Methicillin-resistant *Staphylococcus aureus* (or MRSA) blood laboratory-identified events (bloodstream infections) (alternate Measure ID: HAI_5_SIR)
HAI-6	*Clostridium difficile* (C.diff.) laboratory identified events (intestinal infections) (alternate Measure ID: HAI_6_SIR)

CSV	Unplanned Hospital Visits - Hospital.csv
Measure ID	Measure Name
READM-30-AMI	Rate of readmission for heart attack patients
READM-30-CABG	Rate of readmission for Coronary Artery Bypass Graft (CABG) surgery patients
READM-30-COPD	Rate of readmission for chronic obstructive pulmonary disease (COPD) patients
READM-30-HF	Rate of readmission for heart failure patients
READM-30-HIP-KNEE	Rate of readmission after hip/knee surgery
READM-30-HOSP-WIDE	Rate of readmission after discharge from hospital (hospital-wide)
READM-30-PN	Rate of readmission for pneumonia patients
EDAC-30-AMI	Hospital return days for heart attack patients
EDAC-30-HF	Hospital return days for heart failure patients
EDAC-3-PN	Hospital return days for pneumonia patients
OP-32	Rate of unplanned hospital visits after an outpatient colonoscopy

CSV	Outpatient Imaging Efficiency – Hospital.csv
Measure ID	Measure Name
OP-8	Outpatients with low back pain who had an MRI without trying recommended treatments first, such as physical therapy
OP-9	Outpatients who had a follow-up mammogram, ultrasound, or MRI of the breast within 45 days after a screening mammogram
OP-10	Outpatient CT scans of the abdomen that were "combination" (double) scans
OP-11	Outpatient CT scans of the chest that were "combination" (double) scans
OP-13	Outpatients who got cardiac imaging stress tests before low-risk outpatient surgery
OP-14	Outpatients with brain CT scans who got a sinus CT scan at the same time (If a number is high, it may mean that too many patients are being given both a brain scan and sinus scan, when a single scan is all they need)

CSV	Medicare Hospital Spending per Patient – Hospital.csv
Measure ID	Measure Name
MSPB-1	Spending per Hospital Patient with Medicare (Medicare Spending per Beneficiary)

CSV	Outpatient Procedures –Volume.csv
Measure ID	Measure Name
OP-26	Hospital Outpatient Volume Data on Selected Outpatient Surgical Procedures *This measure is only found in the downloadable database, it is not displayed on Hospital Compare

CSV	HOSPITAL_QUARTERLY_IPFQR_MEASURES_HOSPITAL.csv
Measure ID	**Measure Name**
FUH-7	Follow-up after Hospitalization for Mental Illness 7-Days *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
FUH-30	Follow-up after Hospitalization for Mental Illness 30-Days *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages
HBIPS-2	Hours of physical restraint use *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages
HBIPS-3	Hours of seclusion *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages
HBIPS-5	Patients discharged on multiple antipsychotic medications with appropriate justification *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
IPFQR-PEoC	Assessment of Patient Experience of Care *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
IPFQR-EHR	Use of an Electronic Health Record *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
IPFQR-IMM-2	Influenza Immunization *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
IPFQR-HCP-FluVac	Healthcare Personnel Influenza Vaccination *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
READM-30-IPF	Rate of readmission after discharge from hospital
SUB-1	Alcohol Use Screening *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages..
SUB-3	Alcohol and other Drug Use Disorder Treatment Provided or Offered at Discharge
SUB-3a	Alcohol and other Drug Use Disorder Treatment Provided at Discharge
SMD	Screening for Metabolic Disorders
TOB-1	Tobacco Use Screening *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
TOB-2	Tobacco Use Treatment Provided or Offered *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
TOB-2a	Tobacco Use Treatment (during the hospital stay) *This measure is found in the embedded datasets on the Inpatient Psychiatric Facility Quality Reporting webpages.
TR1	Transition Record with Specified Elements
TR2	Timely Transmission of Transition Record

CSV	HOSPITAL_QUARTERLY_HAC_DOMAIN_HOSPITAL.csv
Measure ID	**Measure Name**
HACRP-D1	Domain 1 Score
HACRP-PSI-90	AHRQ PSI-90 Score (see Appendix E – Footnote Crosswalk for * definition)
HACRP-D2	Domain 2 Score
HACRP-CLABSI	CLABSI Score (see Appendix E – Footnote Crosswalk for * definition)
HACRP-CAUTI	CAUTI Score
HACRP-SSI	SSI Score
HACRP-MRSA	MRSA Score
HACRP-CDI	CDI Score
HACRP-Total	Total HAC Score (see Appendix E – Footnote Crosswalk for * definition)

CSV	Readmission Reduction.csv
Measure ID	**Measure Name**
READM-30-AMI-HRRP	Excess readmission ratio for heart attack patients
READM-30-COPD-HRRP	Excess readmission ratio for chronic obstructive pulmonary disease (COPD) patients
READM-30-CABG-HRRP	Excess readmission ration for Coronary Artery Bypass Graft (CABG) patients
READM-30-HF-HRRP	Excess readmission ratio for heart failure patients

H_COMP_5_A_P	Patients who reported that staff "Always" explained about medicines before giving it to them
H_COMP_5_STAR_RATING	Communication about medicines - star rating
H_COMP_6_STAR_RATING	Discharge information - star rating
H_COMP_6_Y_P	Patients who reported that YES, they were given information about what to do during their recovery at home
H_COMP_7_SA	Patients who "Strongly Agree" they understood their care when they left the hospital
H_COMP_7_STAR_RATING	Care transition - star rating
H_HSP_RATING_9_10	Patients who gave their hospital a rating of 9 or 10 on a scale from 0 (lowest) to 10 (highest)
H_HSP_RATING_STAR_RATING	Overall hospital rating - star rating
H_QUIET_HSP_A_P	Patients who reported that the area around their room was "Always" quiet at night
H_QUIET_STAR_RATING	Quietness - star rating
H_RECMND_DY	Patients who reported YES, they would definitely recommend the hospital
H_RECMND_STAR_RATING	Recommend hospital - star rating
H_STAR_RATING	Summary star rating

Appendix B – Measure Component Definitions

Please note, the following information is available in the *Inpatient Quality Reporting Hospital Compare Preview Help Guide* and *Outpatient Quality Reporting Hospital Compare Preview Report Help Guide* provided on QualityNet.org with each Preview Period announcement.

Timely and Effective Care	Definition
Time-based measures (minutes)	
Emergency Department Volume (EDV) - Denominator	Number based on the volume of patients submitted by a hospital used for the measure OP-22: Left without Being Seen
Numerator	Median time
Denominator	Median times are identified using all cases submitted in the state that are publicly reported. Median time for the nation is based on all cases submitted in the nation. Please note that Outpatient (OP) measures only include publically reported data.
Rate based measures	
Numerator	Score
Denominator	Sample; denominators greater than zero and less than 11 will not be reported on *Hospital Compare*.
Complications and Outcomes	Definition
Numerator	Score; the number of events (deaths, readmissions or complications) within 30 days (or other timeframes for complications) predicted based on the hospital's performance with its observed case mix.
Denominator	The number of outcomes expected based on the nation's performance with that hospital's case mix.
HAI	Definition
Numerator	The observed number of infections
Denominator	The predicted number of infections

Appendix C – HCAHPS Survey Questions Listing

The HCAHPS survey is 32 questions in length and contains 21 substantive items that encompass critical aspects of the hospital experience, 4 screening items to skip patients to appropriate questions, and 7 demographic items that are used for adjusting the mix of patients across hospitals for analytical purposes. An overview of HCAHPS topics (6 composite topics, 2 individual topics, and 2 global topics) can be found on the Survey of Patients' Experiences webpage in the About the Data section of Hospital Compare.

#	Question
Q1	During this hospital stay, how often did nurses treat you with courtesy and respect?
Q2	During this hospital stay, how often did nurses listen carefully to you?
Q3	During this hospital stay, how often did nurses explain things in a way you could understand?
Q4	During this hospital stay, after you pressed the call button, how often did you get help as soon as you wanted it?
Q5	During this hospital stay, how often did doctors treat you with courtesy and respect?
Q6	During this hospital stay, how often did doctors listen carefully to you?
Q7	During this hospital stay, how often did doctors explain things in a way you could understand?
Q8	During this hospital stay, how often were your room and bathroom kept clean?
Q9	During this hospital stay, how often was the area around your room quiet at night?
Q11	How often did you get help in getting to the bathroom or in using a bedpan as soon as you wanted?
Q16	Before giving you any new medicine, how often did hospital staff tell you what the medicine was for?
Q17	Before giving you any new medicine, how often did hospital staff describe possible side effects in a way you could understand?
Q19	During this hospital stay, did doctors, nurses or other hospital staff talk with you about whether you would have the help you needed when you left the hospital?
Q20	During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the hospital?
Q21	Using any number from 0 to 10, where 0 is the worst hospital possible and 10 is the best hospital possible, what number would you use to rate this hospital during your stay?
Q22	Would you recommend this hospital to your friends and family?
Q23	During this hospital stay, staff took my preferences and those of my family or caregiver into account in deciding what my health care needs would be when I left.
Q24	When I left the hospital, I had a good understanding of the things I was responsible for in managing my health.
Q25	When I left the hospital, I clearly understood the purpose for taking each of my medications.

HCAHPS Star Ratings provide a quick summary of each HCAHPS measure in a format that allows consumers to more easily compare hospitals. The HCAHPS Summary Star Rating is a roll-up of all the HCAHPS Star Ratings.

HCAHPS linear mean scores are used in the construction of HCAHPS star ratings. The linear mean scores employ all survey response categories for the items in each HCAHPS measure and are converted and combined into a 0-100 linear-scaled measure score.

Additional information about HCAHPS Star Ratings, including technical notes and frequently asked questions, can be found on the HCAHPS website (www.HCAHPSonline.org).

Appendix D – OAS CAHPS Survey Questions Listing

The OAS CAHPS survey includes questions about patients' experiences with their preparation for the surgery or procedure, check-in processes, cleanliness of the facility, communications with the facility staff, discharge from the facility, and preparation for recovering at home. The survey also includes questions about whether patients received information about what to do if they had possible side effects during their recovery. Survey Materials can be found at the OAS CAHPS site, in the Survey Materials page.

#	Question
Q1	Before your procedure, did your doctor or anyone from the facility give you all the information you needed about your procedure?
Q2	Before your procedure, did your doctor or anyone from the facility give you easy to understand instructions about getting ready for your procedure?
Q3	Did the check-in process run smoothly?
Q4	Was the facility clean?
Q5	Were the clerks and receptionists at the facility as helpful as you thought they should be?
Q6	Did the clerks and receptionists at the facility treat you with courtesy and respect?
Q7	Did the doctors and nurses treat you with courtesy and respect?
Q8	Did the doctors and nurses make sure you were as comfortable as possible?
Q9	Did the doctors and nurses explain your procedure in a way that was easy to understand?
Q10	Anesthesia is something that would make you feel sleepy or go to sleep during your procedure. Were you given anesthesia?
Q11	Did your doctor or anyone from the facility explain the process of giving anesthesia in a way that was easy to understand?
Q12	Did your doctor or anyone from the facility explain the possible side effects of the anesthesia in a way that was easy to understand?
Q13	Discharge instructions include things like symptoms you should watch for after your procedure, instructions about medicines, and home care. Before you left the facility, did you get written discharge instructions?
Q14	Did your doctor or anyone from the facility prepare you for what to expect during your recovery?
Q17	Before you left the facility, did your doctor or anyone from the facility give you information about what to do if you had nausea or vomiting?
Q18	At any time after leaving the facility, did you have nausea or vomiting as a result of either your procedure or the anesthesia?
Q19	Before you left the facility, did your doctor or anyone from the facility give you information about what to do if you had bleeding as a result of your procedure?
Q20	At any time after leaving the facility, did you have bleeding as a result of your procedure?
Q21	Possible signs of infection include fever, swelling, heat, drainage or redness. Before you left the facility, did your doctor or anyone from the facility give you information about what to do if you had possible signs of infection?
Q22	At any time after leaving the facility, did you have any signs of infection?
Q23	Using any number from 0 to 10, where 0 is the worst facility possible and 10 is the best facility possible, what number would you use to rate this facility?
Q24	Would you recommend this facility to your friends and family?

Appendix E – Footnote Crosswalk

The footnote numbers below are associated with the Hospital Compare quality measures:

Hospital Compare Footnote Values			
#	**Text**	**Definition**	
1	The number of cases/patients is too few to report.	This footnote is applied: • When the number of cases/patients does not meet the required minimum amount for public reporting; • When the number of cases/patients is too small to reliably tell how well a hospital is performing; and/or • To protect personal health information.	
2	Data submitted were based on a sample of cases/patients.	This footnote indicates that a hospital chose to submit data for a random sample of its cases/patients while following specific rules for how to select the patients.	
3	Results are based on a shorter time period than required.	This footnote indicates that the hospital's results were based on data from less than the maximum possible time period generally used to collect data for a measure. View the Hospital Compare Data Collection Periods for more information. This footnote is applied: • When a hospital elected not to submit data for a measure for one or more, but not all possible quarters; • When there was no data to submit for a measure for one or more, but not all possible quarters; and/or • When a hospital did not successfully submit data for a measure for one or more, but not all possible quarters.	
4	Data suppressed by CMS for one or more quarters.	The results for these measures were excluded for various reasons, such as data inaccuracies.	
5	Results are not available for this reporting period.	This footnote is applied: • When a hospital elected not to submit data for the entire reporting period; or • When a hospital had no claims data for a particular measure; or • When a hospital elected to suppress a measure from being publicly reported.	
6	Fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.	This footnote is applied when the number of completed surveys the hospital or its vendor provided to CMS is less than 100.	
7	No cases met the criteria for this measure.	This footnote is applied when a hospital did not have any cases meet the inclusion criteria for a measure.	
8	The lower limit of the confidence interval cannot be calculated if the number of observed infections equals zero.	None	
9	No data are available from the state/territory for this reporting period.	This footnote is applied when: • Too few hospitals in a state/territory had data available or • No data was reported for this state/territory.	

	Hospital Compare Footnote Values	
#	Text	Definition
10	Very few patients were eligible for the HCAHPS survey. The scores shown reflect fewer than 50 completed surveys. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.	This footnote is applied when the number of completed surveys the hospital or its vendor provided to CMS is less than 50.
11	There were discrepancies in the data collection process.	This footnote is applied when there have been deviations from data collection protocols. CMS is working to correct this situation.
12	This measure does not apply to this hospital for this reporting period.	This footnote is applied when: • There were zero device days or procedures for the entire reporting period, • The hospital does not have ICU locations. • The hospital is a new member of the registry or reporting program and didn't have an opportunity to submit any cases; or • The hospital doesn't report this voluntary measure; or • Results for this VA hospital are combined with those from the VA administrative parent hospital that manages all points of service.
13	Results cannot be calculated for this reporting period.	This footnote is applied when: • The number of predicted infections is less than 1. • The number of observed MRSA or Clostridium difficile infections present on admission (community-onset prevalence) was above a pre-determined cut-point.
14	The results for this state are combined with nearby states to protect confidentiality.	This footnote is applied when a state has fewer than 10 hospitals in order to protect confidentiality. Results are combined as follows: (1) the District of Columbia and Delaware are combined; (2) Alaska and Washington are combined; (3) North Dakota and South Dakota are combined; and (4) New Hampshire and Vermont are combined. Hospitals located in Maryland and U.S. territories are excluded from the measure calculation.
15	The number of cases/patients is too few to report a star rating.	This footnote is applied when the number of completed surveys the hospital or its vendor provided to CMS is less than 100. In order to receive HCAHPS Star Ratings, hospitals must have at least 100 completed HCAHPS Surveys over a four-quarter period.
16	There are too few measures or measure groups reported to calculate a star rating or measure group score.	This footnote is applied when a hospital: • Reported data for fewer than 3 measures in any measure group used to calculate star ratings; or • Reported data for fewer than 3 of the measure groups used to calculate star ratings; or • Did not report data for at least 1 outcomes measure group.
17	This hospital's star rating only includes data reported on inpatient services.	This footnote is applied when a hospital only reports data for inpatient hospital services.
18	This result is not based on performance data; the hospital did not submit data and did not submit an HAI exemption form.	This footnote is applied when a hospital did not submit data through the National Healthcare Safety Network (NHSN) and did not have a HAI exemption on file. In such a case, the hospital receives the maximum Winsorized z-score.
19	Data are shown only for hospitals that participate in the Inpatient Quality Reporting (IQR) and Outpatient Quality Reporting (OQR) programs.	Footnote is applied for those hospitals that do not participate in the IQR, OQR programs.

		Hospital Compare Footnote Values	
#	Text	Definition
20	State and national averages do not include Veterans Health Administration (VHA) hospital data.	Data for VHA hospitals are calculated separately from data for other inpatient acute-care hospitals. This footnote is no longer used.
21	Patient survey results for Veterans Health Administration (VHA) hospitals do not represent official HCAHPS results and are not included in state and national averages.	The VHA Survey of Healthcare Experiences of Patients (SHEP) inpatient survey uses the same questions as the HCAHPS survey but is collected and analyzed independently. This footnote is no longer used.
22	Star ratings are not calculated for Veterans Health Administration (VHA) hospitals	• VHA hospitals are not included in the calculations of the Hospital Compare overall rating. • DoD hospitals are not included in the calculations of the Hospital Compare overall rating or the HCAHPS star ratings.
23	The data are based on claims that the hospital or facility submitted to CMS. The hospital or facility has reported discrepancies in their claims data.	This footnote is applied when a hospital or facility alerts CMS of a possible issue with the claims data used to calculate results for this measure. Calculations are based on a "snapshot" of the administrative claims data and changes that hospitals or facilities make to their claims after the snapshot are not reflected in the data. Issues with claims data include but are not limited to the use of incorrect billing codes or inaccurate dates of service.
24	Results for this VA hospital are combined with those from the VA administrative parent hospital that manages all points of service.	This footnote is applied to VA hospitals only.
25	State and national averages include Veterans Health Administration (VHA) hospital data.	Data for VHA hospitals are calculated along with data for other inpatient acute-care hospitals.
26	State and national averages include Department of Defense (DoD) hospital data.	Data for DoD hospitals are calculated along with data for other inpatient acute-care hospitals.
27	Patient survey results for Department of Defense (DoD) hospitals do not represent official HCAHPS results and are not included in state and national averages.	The DoD TRICARE Inpatient Satisfaction Survey (TRISS) uses the same questions as the HCAHPS survey but is collected and analyzed independently.
	Maryland data foonotes	
*	For Maryland hospitals, no data are available to calculate a PSI 90 measure result; therefore, no performance decile or points are assigned for Domain 1 and the Total HAC score is dependent on the Domain 2 score.	None
**	This value was calculated using data reported by the hospital in compliance with the requirements outlined for this program and does not take into account information that became available at a later date.	None
a	Maryland hospitals are waived from receiving payment adjustments under the Program	None
	CJR data footnotes	

#	Text	Definition
	**Hospital Compare Footnote Values**	
*	Ineligible for reconciliation based on performance on CJR-specific quality measures	None
**	Did not perform eligible CJR episodes as defined at § 510.210 of the CJR final rule	None
***	Too few completed surveys or months of data to calculate HCAHPS Linear Mean Roll-up score	None
****	Does not participate in the Inpatient Quality Reporting (IQR) program	None
	**OAS CAHPS data footnotes**	
1	Very few patients completed the survey. The scores shown, if any, reflect a very small number of surveys and they do not accurately tell how a facility is doing.	None
2	Survey results are based on less than 12 months of data.	None
3	Fewer than 100 patients completed the survey. Use the scores shown, if any, with caution as the number of surveys may be too low to accurately tell how a facility is doing.	None
4	No survey results are available for this reporting period.	None
5	There were problems with the data and they are being corrected.	None
